Dec 14, 2012   package manager resolves to incorrect address on welcome screen

I have an installed CQ5 instance that seems to be incorrectly resolving /crx/packmgr/ to /libs/cq/core/content/welcome/features/packages.html on the /libs/cq/core/content/welcome.html screen. I have compared this to the default installs of CQ5 admin, and it seems that indeed /crx/packmgr/ should be the link. When... [Read All]

Jan 4, 2013   i18n value in sling include

I am unable to get I18n value in sling include content in 404.jsp/default.jsp. Basically I am including a 404 page (based on some template) into sling/servlet/errorhandler/default.jsp like <sling:include path="/content/mysite/en/errorpage" /> I am able to see the included error page in case of 404. But... [Read All]

Feb 13, 2015   how to determine Dispatcher is working with CQ5 Publish instance.?

Hi all create author and publish instance for CQ5 site, when author modify any content over the site these are replicated on publish instance successfully, now i want to use dispatcher so for this i have configured that with publish instance in IIS as described in the article CQ Dispatcher IIS Set Up - CQ Tutorials. now i want to check...
